### Who it is for

For all of those who recognize the importance of creating and communicating a strategic vision and willing to learn how to do it step by step.

#### What it is about

Every journey starts with a vision. The reason to design, create or change anything comes from your perspective. You start on your journey because you think that the world could be different, a problem could be solved, a product or service could be created.

That is, in the core what vision is about!

Your vision is your compass, the north star that is guiding every strategic and operational decision you make. A clear vision makes it easier for people to believe in your company, no matter if they are team members, partners, or customers.

By understanding the direction you take and the values that are non-negotiable, you will save time wasted in fruitless discussions, and create more clarity, making it easier for team members to work towards a common goal.

So, in short, having a great vision is a vital part of the equation for every company, product team, or start-up.

## **Program Overview**

#### Introduction

The reason vision is so important in your journey – either be a design, a product or service, is because it's a hard journey, and you won't be making it alone. If you can create a compelling vision that your targeted audience can believe in, it becomes much easier to join forces and commit.

How do you create a vision? In this workshop and as a group, you will work on creating your strategic vision, following the steps of the journey that will take you there.

#### Learning Objectives

Learning by doing: Get to know the process of creating a vision through the actual practice of the methodology itself.

#### Content

In this workshop, we will the following topics:

✓ Introductions & Ice-Breaker,

- ✓ Workshop Overview,
